“IVC Commercial Lines up at Hewlett Packard Enterprise”

The County Kildare offices of Hewlett Packard Enterprise have been fitted with carpet tiles and LVT from IVC Commercial, the world's fastest growing flooring company.

IVC Commercial's Academic View carpet tile from the Art Exposure collection has been installed over 330m² of working and meeting space with Moduleo 55 Expressive Shades emboss-in-register LVT adorning 135m² of open desk working, collaboration and breakout zones.

Designed by *designfolk, an interiors and brand design agency based in Dublin that's the creative design partner for Hewlett Packard Enterprise, the refurbishment has created a space fitting of a leading global company. With a pattern of interconnecting lines reflecting the company's cloud technology activity featuring on ceilings, walls and etched

into glass partitions, as well as reflected in the angular zones of the floorspace; it's a striking space.

Both IVC Commercial floors chosen by *designfolk mirror this interconnecting theme with the tonal intersecting diagonal lines of the Academic View carpet tile and Moduleo 55 Expressive Shades' unmistakable wood-effect linear pattern. Both made in Belgium in the most efficient plants in Europe, the floors provide an affordable and responsible design solution.

Using IVC Commercial's 40% recycled content ColorStrand® stain- and fade-resistant nylon, Academic View provides a lasting, comfortable and sound-absorbing underfoot surface that's ready to cope with the needs of a busy high-end office environment. The carpet tile was chosen in the functional duo-tone grey of 924.

Made with 50% recycled content, Shades is part of IVC Commercial's Moduleo 55 Expressive collection of LVT. Bringing commercial interiors natural wood and stone effects in unusual patterns, the collection uses IVC Commercial's emboss-in-register technology for a more authentic look. Equipped with a wear layer suitable for high-traffic environments and with Protectonite® for an easy to look after finish, Shades in the two colours of 62220 and 62990 now delivers a floor perfectly in-tune with its environment.

Designed and specified by *designfolk, the refurbishment of Hewlett Packard Enterprise's County Kildare offices was carried out by IIS Space Ltd, a specialist workplace fitout, refurbishment and construction company.
