“IVC Commercial Sets the Mood at Sandown Racecourse”

IVC Commercial's Moduleo 55 and Studio Moods concept LVT has been installed in the hospitality areas of the grandstand and Bendigo Suite of Sandown Racecourse.

As a Gold Standard racecourse and one of the top event venues in the country, it's important that Sandown's award-winning facilities reflect its status. So, for the refurbishment of its grandstand hospitality areas and Bendigo Suite, IVC Commercial's striking Studio Moods concept, alongside Moduleo 55 LVT, was specified by Intex Projects.

Studio Moods offers a fast-track bespoke effect LVT floor, with Intex Projects opting

for the stylish stone effect of Hexagon Azuriet for use throughout the Bendigo Suite. The pronounced tonal variation of Mexican Ash from Moduleo 55 Woods brings a welcoming natural look and the capability to withstand high levels of footfall throughout connected hospitality areas of the grandstand.

Charles Wolverson, Intex Projects, comments; **“We needed a durable and highly attractive finish, while also meeting a 20% saving on project costs across the board. IVC Commercial’s ability to deliver the design and performance we wanted at the price we required made its floors the obvious**

choice. IVC Commercial’s LVT met the design and performance requirements of the original specification at a better price point.”

A total of 1,000m² of LVT floors from IVC Commercial were used in the Belgian manufacturer's top-rated 55 specification. Finished with Protectonite® PUR for a finish that is scratch and mark resistant as well as easy to maintain without specialist cleaning, 55 floors achieve a Class 33 Heavy Commercial rating. LVT from IVC Commercial is made in Belgium using renewable energy and features up to 50% recycled content.
